

Digital Charging Solutions GmbH - Brunnenstraße 19-21 - D-10119 Berlin

Price List Great Britain

The BMW Charging rates are governed by the maximum charging speed.

BMW Charging differentiates the following charging speeds:

- AC charging stations up to a max. of 43 kW capacity
(AC – alternating current)
- DC charging stations up to a max. of 50 kW capacity
(DC – direct current)
- HPC charging stations up to a max. of 150 kW capacity
(HPC – high power charging)

Please note that the transaction units for charging in public areas may vary due to regulatory requirements in the individual European countries. A transaction is differentiated in terms of kWh, time (min.), or by charging event. All prices are individually based on charge point operators. A variable tariff applies with regard to the individual charging process. The prices depend on respective charge point operators. For charging abroad (= e-roaming), you will always pay the local sales rate without any additional fees.

Digital Charging Solutions GmbH - Brunnenstraße 19-21 - D-10119 Berlin

Charging Event Transaction

The invoicing of varying fees for charging is based on the appropriate tariff per minute (per commenced minute), per kWh or per charging event. The charging event starts if the vehicle is connected to the charging station and ends when it is disconnected.

You can also recharge for free using the BMW Charging service at free charging stations.

Valid from 01.02.2021, all rates incl. VAT, subject to changes and errors.
